

# GAYATRI SHRINIVAS BALLARI

## Data Scientist

✉ [gayathriballari786@gmail.com](mailto:gayathriballari786@gmail.com) ☎ +919591104686 📍 Bangalore, India 🔗 [linkedin.com/in/gayatri-ballari](https://linkedin.com/in/gayatri-ballari)  
🐙 [github.com/Gayatri-Ballari](https://github.com/Gayatri-Ballari)

## Profile

Experienced data scientist with over two years and 3 months of contracting, worked on GenAI project, developed DL and ML models improving accuracy by 20%. Proficient in Python and SQL, enhanced data pipelines by 25%. Utilized Tableau and Power BI, creating dashboards and boosting data accessibility by 40%.

## Skills

**General Skills** — | Generative AI | LLMs | Advanced Analytics | Machine Learning Algorithms | Data Visualization Techniques | Deep Learning | Database Optimization | Statistical Modeling | Data Preprocessing | Quality Assurance Standards | Predictive Modeling Skills | Natural Language Processing (NLP) | Time Series Analysis | Optimization Algorithms | Feature Engineering | Data Mining | Sentiment Analysis | Cross-Validation Techniques | GitHub Collaboration

**Technical skills** — Operating System: Windows | Database/Server: My SQL, SQL server | Programming Language: Python, Scikit-learn, OpenCV, Django, SQL | Other Software/Tools: Tableau, Deep learning, Machine learning, Tabular and Classical data

## Professional Experience

**Data scientist, Acies Global** 🌐

Jul 2024 – present  
Bangalore, India

### QA Chatbot

- Extracted data from **S3 bucket**, utilizing **HNSW indexing** for efficient verification
- Transitioned to **Neo4j knowledge graph**, processing user queries with **LLM model**
- **Implemented RAG pipeline** with **LangChain** and knowledge graph for enhanced question-answering
- Leveraged **Amazon Bedrock FMs** with prompts to extract company names from user inputs
- Developed **Python** unit test suite for script validation and experimented with **Flake8** for code linting

**Data Scientist, T-systems ICT India Pvt. Ltd, Bengaluru**

Dec 2022 – May 2024  
Bengaluru, India

### Public Transport

- Utilized YOLO for object detection, **achieving 95%** accuracy in identifying vehicles and pedestrians with high precision and reliability
- Streamlined processing time by **40%** through the seamless integration of **Deepstream Containers**, resulting in a significant reduction of processing latency and improved overall system performance
- Boosted system efficiency by **25%**, increasing throughput

### Smart Chatbot

- Developed predictive models to slash resource allocation expenses by **20%**
- Enhanced user interactions with NLP, increasing user satisfaction by **30%**
- Automated repetitive tasks, cutting manual workload by **50%**
- Expanded reach by **40%** through multi-language support

### Face Detection Attendance System

- Achieved 85% accuracy in real-time video streams for face recognition
- Streamlined data synchronization with HR systems, reducing time by 35%

- Scaled system capacity to handle large volumes of data, supporting up to **100,000 users**

**Data science trainee**, *Besant technologies*

May 2022 – Jul 2022

Bengaluru, India

- Incorporated **advanced data models** and **algorithms**
- **Enhanced** product development **precision** by **40%**
- **Accelerated** feature release by **25%**

#### Smart Chat for Health Insurance

- Analyzed data from hospitals, government organizations, and health insurance to find patterns and insights
- Strengthened **fraud detection and prevention** mechanisms, decreasing fraud cases by **25%**

## Publications

---

**AN EXPLAINABLE-AI BASED SKIN DISEASE DETECTION**, *Gayatri Ballari* [🔗](#)

Nov 2022

- **Project Aim:** Utilize **deep learning/machine learning techniques** for the machine-driven identification of skin illnesses.
- **ResNet18 Model:** Achieves a classification accuracy of **96%**.
- **Grad-CAM:** Enhances model explainability for **dermatologists**.
- **Literature Survey:** Examines deep-learning research on skin disease diagnosis using **structural photos**.

## Certificates

---

• Google Data Analytics by Google [🔗](#)

• Deep learning by Deep learning.AI [🔗](#)

• Python for Data Science, AI & Development [🔗](#)

## Education

---

**M.Tech in Computer Science**, *KLE Technological University*

Hubli, India

**B.E in Computer Science**, *Government Engineering College*

Haveri, India
